

The Mango Block

Each block measures 6" finished. Start with a 7" square of both your background fabric and corner feature fabric. Right-sides together, mark a line diagonally from one corner to the opposite corner. Stitch 1/4" on either side of the marked line, and then cut on the diagonal line. Press your two half-square triangle blocks, with seams open.

I chose to make the center of my block in the same fabrics as the corner, with fabrics reversed. In that case, you can cut templates A and C from the same square. (If you'd like template A in another fabric, start with 4 1/2" squares and make hsts in the same way.)

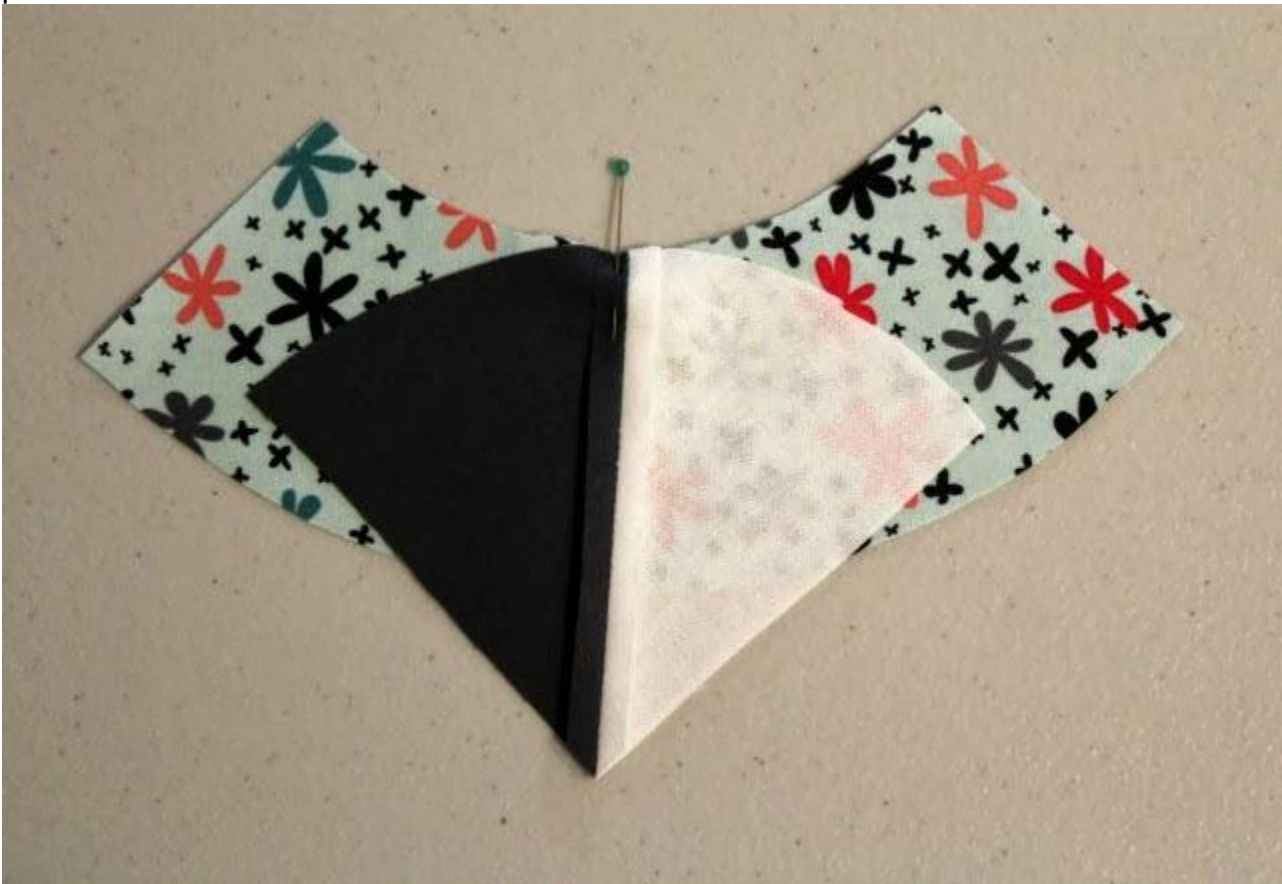

Cut your block arc using template B.

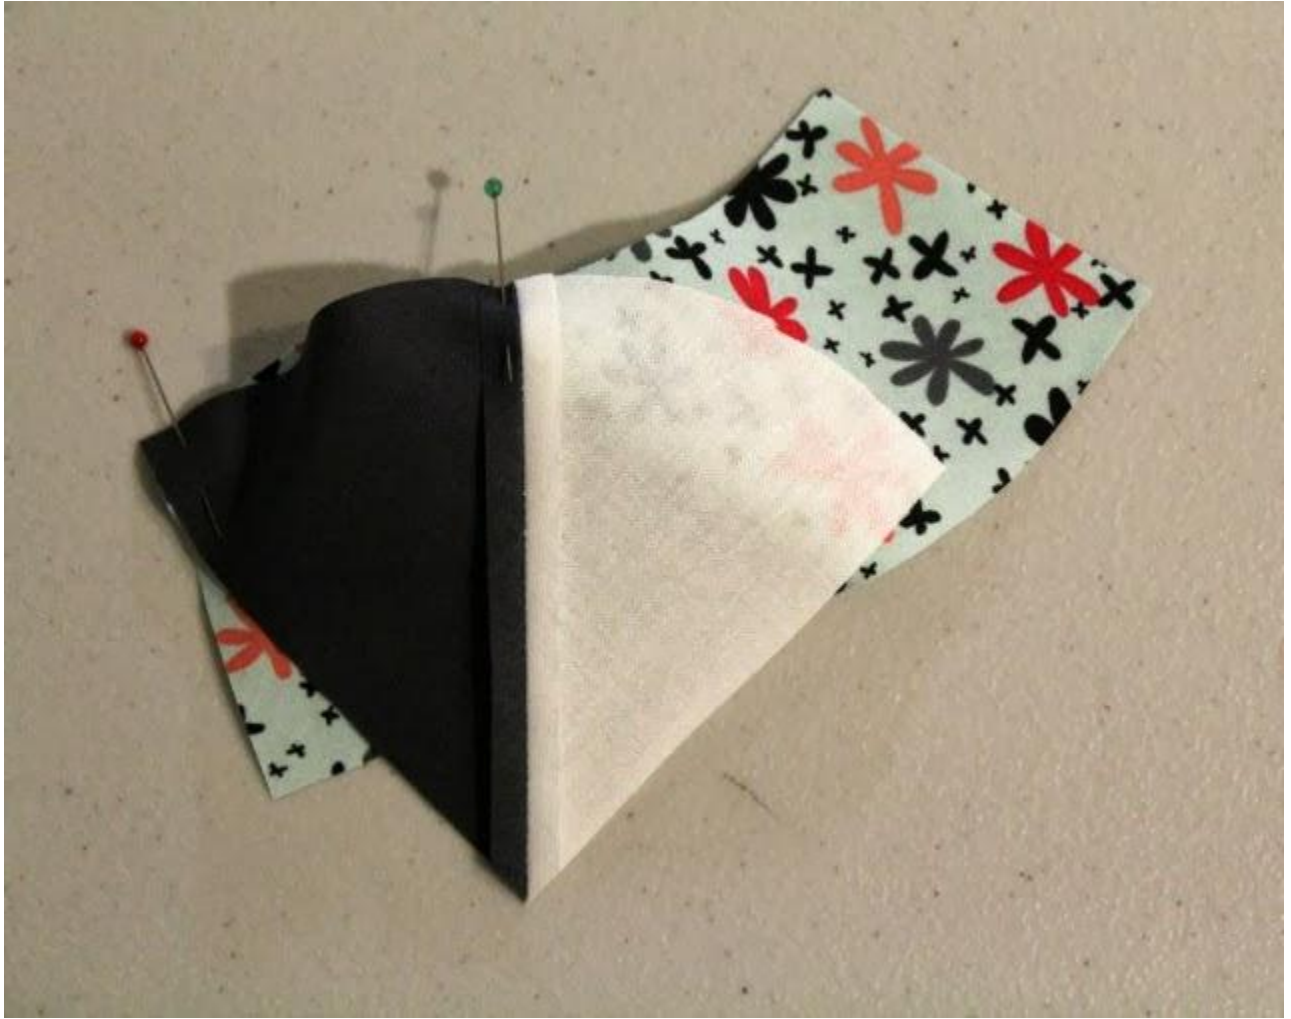

Here's what you'll have for 1 block. Note that the arc is pressed in half.

If you are experienced in stitching curves, you may choose to do it without pins. But if not, start with 1 pin in the center.

Match up one edge and pin carefully. Match and pin the opposite edge, and then continue to pin with edges even. I found a couple more on each side was plenty. Stitch center triangle and arc together.

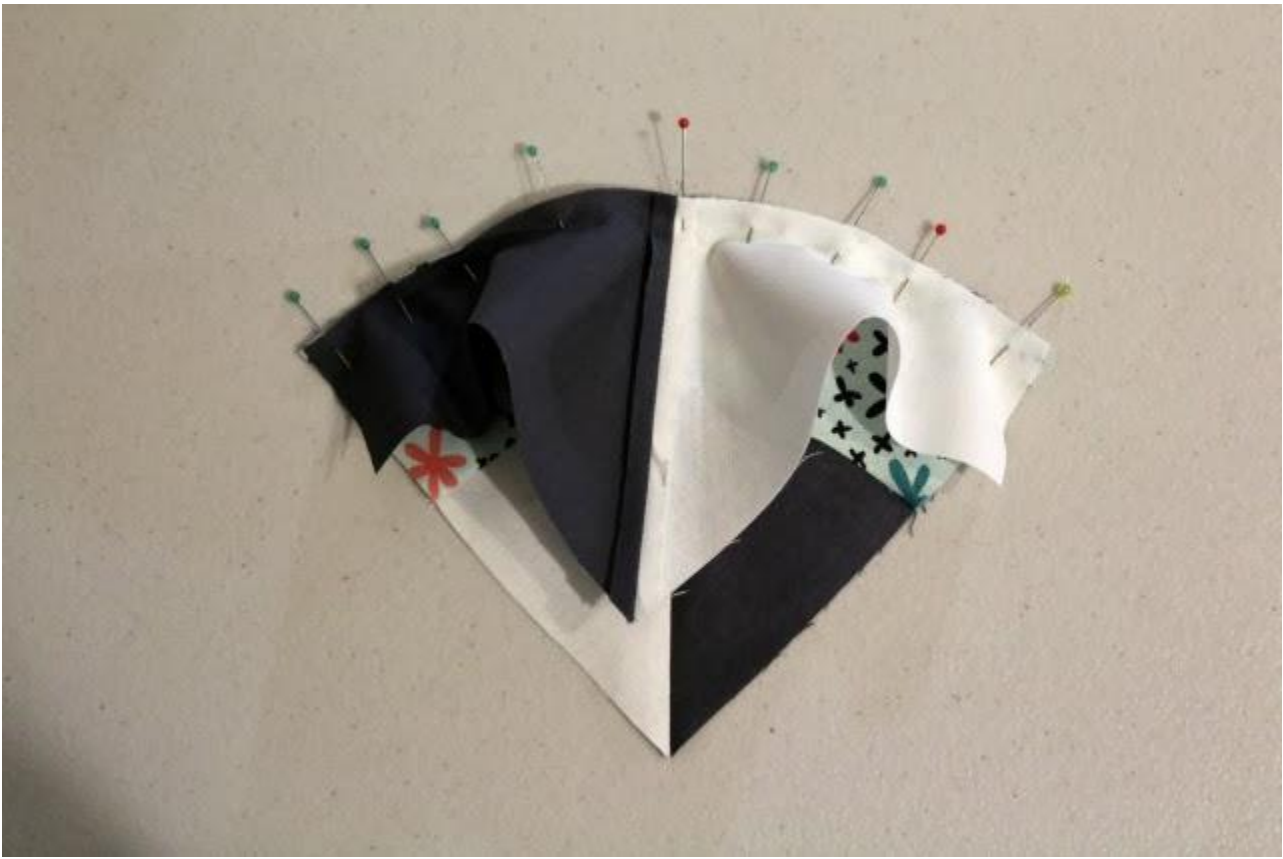

Press well. I chose to press towards the arc.

Add corner piece in a similar fashion, beginning with a single pin in the center.

Press well.

And that's it!
